## **DETAILED ACTION**

### ***Species Election***

Claims 1-12 are generic to a plurality of disclosed patentably distinct species of PDE4 inhibitors and psychiatric disorders.

These claims encompass species of PDE4 inhibitors that are so diverse that a reference anticipating one of the species would not anticipate or render obvious the other species. For example, 6-isopropyl-8-(3-((Z/E)-2-[4-(methylsulfonyl)phenyl]-2-phenylethenyl)phenyl)quinoline contains a quinoline group while 4-{2-[3,4-Bis(difluoromethoxy)phenyl]-2-[5-(2-(1-hydroxy-2,2,2-trifluoroethyl)-thiazolyl)ethyl]}pyridine contains a pyridine which would render their chemical and/or physical properties contrastingly different. Thus, applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claims 1-12 are generic.

Specifically, applicant is required to elect a particular psychiatric disorder to be treated with the invention. Alternatively, applicant may elect a particular psychiatric disorder listed in claim 2.

Applicant is required to elect a particular psychotherapy treatment to be used in the invention. Alternatively, applicant may elect a particular psychotherapy listed in claims 3, 4, 5, 6, 7, or 8.

Applicant is required to elect a particular PDE4 inhibitor with the aforementioned invention. Alternatively, applicant may elect a particular PDE4 listed in claims 9, 10, 11, or 12. Applicant is further cautioned to disclose both a name and corresponding structure of the elected PDE4 inhibitor

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 (a) of the other invention.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

No telephone call was made due to the complexity of the election/restriction.
